

SGP Virtual Development Expo

MAY 26, 2022

Building Together for the Future of Senior Care

Together, with our national vendor partners, SGP has organized our First Virtual Development Expo. The Development Expo provides you the perfect opportunity to meet with community representatives and businesses from across Canada; deepening your knowledge, making new connections and sharing ideas in the Senior Care Sector. The main focus will be on the 5 phases of development with an emphasis on education and resources that will guide and support you throughout your new and/or redevelopment projects.

Anyone who is interested in learning more about new developments/redevelopment projects are welcome.

WHO SHOULD ATTEND

Corporate Development/Redevelopment
Project Management Office
Corporate Functional Departments
Owners
Administrators
General Managers
Home Managers

- 
- 
- Pre-book and attend 1:1 virtual appointments (10 mins each) with vendors ask questions about products and services to assist with projects.
 - Education Sessions with important and relevant topics to help you in your new or ongoing projects.
 - Gain insight from our industry experts of panels as they discuss pertinent topics related to development.

WHY ATTEND

Closing Remarks
Networking Break

Panel Discussion

Tips & Pitfalls around the 5 Phases of Development

Join our panel of organizational leaders who will share their insights and learnings in regards to managing new and redevelopment project challenges in Senior Care.

Andrew Hough, Procurement Director, SGP Purchasing Partner Network
Laverne Hudson, Vice President Property Development & Construction, Extendicare
Tawnia C. Pilgrim, Director Redevelopment, Extendicare

Education Forum

There will be 2 Education Forums (A & B) scheduled.

Both forums will have the same vendors presenting - you will have the opportunity to choose one education presentation in Forum A and another education presentation in Forum B.

KRUGER PRODUCTS L.P.

Cost & Use - How to choose the correct towel, bath tissue, napkins

Using a brown kraft towel is not a better and more environmentally friendly choice. In a towel or a napkin. Choosing a white towel that has better absorbancey is always the best choice. 80% of Krugers skus are FSC certified and Ecologo certified. Roll towel vs folded towel will always bring the most savings. Bath tissue in a dispenser is always the best option vs a commodity roll. These can all be shown to a customer in a cost & use tool we use at Kruger.

ARJO CANADA INC.

Optimizing Facility Planning

This presentation discusses the challenges of utilizing space safely and efficiently in modern care facilities.

HANDICARE

Ceiling Lift and Bathing Room Design Considerations for New Builds

Provide an overview of the important factors to consider when designing ceiling lift tracking and bathing rooms into new builds and redevelopments. This includes tracking layout options, as well as high level structural, electrical and plumbing considerations. Cost/benefits of different options will also be discussed.

ALTRO FLOORS AND WALLS

Design Insights for Creating Safer Interiors: selecting interior finishes that balance safety and wellbeing.

Senior Living communities, although healthcare environments, are residential in nature and residents need to feel safe and secure. Whether a new building or a renovation, a community should be designed to support inclusivity and encourage connection thus contribute to that sense of belonging that is central to not only physical health but also social, spiritual and emotional well-being. This presentation will discuss how the built environment can support this goal by understanding the underlying human needs of the residents and how the appropriate selection of floors and wall protection can promote wellness, support independence and foster safety and security. We will explore the world through the eyes of the aging resident and discuss the criteria involved in selecting appropriate interior floor and wall finishes to support the changing and diverse needs of these individuals.

SWISH

Future of Clean in Senior Care Settings

New Technologies in cleaning equipment to uphold standards of hygiene efficiently and still maintain the same level of labour and budgetary dollars.

DIVERSEY

The IPAC Impact: Infection Prevention and Control Considerations For Development

From furniture, to finishings, flooring and fixtures, so many decisions made at the planning stages of a new development or building improvement project have major implications on future facility management personnel and operating budgets of senior care locations. Leveraging key learnings from redevelopment in acute healthcare, this session will explore infection prevention and control considerations at the planning stage that help minimize challenges, reduce future unnecessary capital expenditures and help safeguard senior care against outbreaks.

BUSINESS INTERIORS BY GLOBAL FURNITURE

Best Practices in Furniture Design for Senior Living

Successful senior living spaces need to deliver an experience that feels like home, while safeguarding against injury and outbreaks, both seasonal and pandemic. Furniture within these settings can help shape a built environment that provides the safe delivery of clinical services while supporting resident comfort, independence, dignity and respect.

BUNZL

New Build 101 – The Building Blocks of Designing and Establishing an Efficient and Effective Outcome Based Cleaning Program.

New builds are exciting times! Larger, more spacious, new décor and new surface types! Along with this excitement however comes the challenges of associated with this. What equipment do we require? How much staff for this larger space? What are the procedures for maintaining all of the new surfaces? How do we measure results and ensure desired outcomes are achieved?

This session will explore a step by step ground up process for designing, implementing and maintaining an efficient and effective housekeeping program and provide a foundation for maintaining a clean, healthy and safe environment.
